

CAN YOU HELP THE

PEOPLE OF UKRAINE

Mothers and the CHILDREN

Support south Ukraine villages during war.

In this respect, we would like to inform you about the Ukraine village's situation during this dramatic wartime.

I was born in Ukraine, Ismail city, and I was called by the villages to help them, some of them moved to Europe and Moldova but not all have this possibility and I know in detail the situation.

By the way in a such dramatic period in Ukraine where people died, I would like to ask for support.

I take in my home 2 families with children from the south of Ukraine Ismail city.

Just to confirm that the fund that received Ukraine and Moldova do not get in these small villages of Ukraine, as Oziornoe villages, and others there.

With my deepest condolences and awareness, I ask you to get funds, especially for these persons which really are old and have no bread, no gas and water, and medicaments, few times per day is switch off the light. The pension to the retired people this month is not received. Time is hard and cannot be described in words.

Hand by hand and with your support we will help the people from the south of Ukraine directly.

My Company and I will organize everything here (from medicaments to food including transportation to the location directly to them), this will be official, there in the south of Ukraine is no motor oil

The people from the south have no possibility to leave the country Ukraine just to say and to wait for peace.

Women, persons from vulnerable families, such as persons with disabilities and children where the other is going to fight in the war.

Despite Ukraine's early successes, however, there is no guarantee this situation will remain this way.

Please believe I try to do all the best for the people and to encourage, support them with your support.
